Hi Bill,

I have a photo 70"x86" I need printed which is a separate project from the others we've been working on. What's the largest size that can be printed on photo paper? and could this be printed on one piece of canvas with enough extra material around the edges in order to be stretched? I'm not sure yet which type of material we will want to print on. We are still working on which image we want to use for the larger canvas.. nothing seems to be right.
