unfor=unately Wisconsin is a long ways from California. But I will be inte=ested in seeing the protocol. Let me know how I might be of help.&nb=p; I have not seen many savants lately where prime numbers are prominent like George and Charles Finn of old. Surfacing=more often as items savants know but never learned is calendar calculating= periodic table, solar system, geography. While not universal,=calendar calculating as an inherited 'chip' seems nearly so. Calendar calculating can be learned and some Neurotypical= (NP) do so. But in savants, and some NP children, it seems factory =nstalled. And I am convinced they are using a different, unconscious= circuitry. That could be tested. As an aside, I was astounded by a young child at the Treffert Center who seemed to know=an astronomical amount of knowledge which his parents and I thought he had=no access to prior. Turns out he (age 4) discovered Google on =is computer/ipad. So I will have to be more careful.

=nbsp;

I wil= be interested in your deliberations.

=nbsp;

Darol= Treffert

Subject: MATH SAVANT / videos

Hello Deepak,

I met you briefly at the El Cerrito HOME event. In case you didn't receive my videos (Math Savant) since you were in 'silence'. You mentioned neuroscientists could be interested.

In the videos below, you will see him do ratios of 48's up to 10,000, both plus and minus for any number. Basically, he is able to tell you the difference between his father's age (53 at the time) and his age (5 at the time) at any number range, mostly below 10,000. It was discovered last September 2016. He father lives in England so they do this through Skype. He can branch off to other people's age if he knows them, etc.

Thanks for your attention - Carolyn
