I am in the hospital with [REDACTED] for more than 24 hour, but she can't wake up. They give her pain medication and it makes her very drowsy. She knows I am here, but can't open her eyes. When I talk to her she makes moves with her head only...doctor came by and told that tomorrow she will have a major test to see how it spread and after they will send her home for chemo therapy at outpatient clinic....I am waiting for [REDACTED] to come back and will go back to the office, he needed to step out

Thank you,

Bella
