This is Aaro='s website not an app it allows anyone to type in any cancer term and =ind any clinical trial or researcher worldwide. It is updated every 24 hou=s and is in process of being updated with additional information for the b=nefit of patients and researchers. We allow it as a free open platform tha= can be expanded to specific interests. If for instance you type in gliobl=stoma and go out 10,000 miles from your location you can see researchers a=d clinical trials worldwide. Look at the map then press for example German= and see what is available.
